MALLORCAIR

VIVIR LA EXPERIENCIA

As part of their commitment to offer their customers the best possible service, in July Mallorcair FBO launched completely renovated facilities which offer a unique space in Mallorca airport's private plane terminal.

The most important thing is to allow their customers feel at home, and to enjoy the comfort of a space which offers them a high level of intimacy. Following these premises, the Marga Comas Interior Design studio has adapted the terminal to meet the requirements of Mallorcair FBO customers.

Following a complete renovation, the new facilities offer an organic, welcoming space, distributed across 2 large areas, offering a series of spaces which guarantee passengers intimacy and privacy. The interior design is characterised by its furniture, designed especially for the new terminal, as well as the selected materials and colours. These aim to represent the island's Mediterranean essence.

Over the last few years, Mallorca's private plane terminal has become a location where a lot of Mediterranean traffic passes through. A terminal through which a wide range of people pass, including great businessmen and directors of multinational companies, to Silicon Valley's most outstanding technological business owners, princes and princesses from the Middle East, actors, actresses and renowned footballers, and many more.

This project represents one step further in Mallorcair FBO's proposal of excellence. For this reason, they have taken advantage of the extensive experience of interior designer Marga Comas, who has worked in hotels, commercial spaces and luxury properties.
